

Linear Air Slide

Increase Productivity and Reproducibility

Extended stroke enhances a scanner's ability to inspect highly contoured or irregular shaped parts while accomplishing large area C-scans.

Features

- Range of travel is available in 4" and 5" options
- Compliant to curvature
- Constant force over variable contours with precise control
- Switchable operation between Extend-Neutral-Retract

Capabilities

- Reverse compatible with current sensors and holders
- Customized to enhance scanner capabilities
- Lightweight pneumatic slide mechanism
- Compatible with AUSS Mobile and MAUS Systems
