

# SCAN ARM EXTENSION BRACKET

The 10.5" adjustable extension bracket attaches to the end of the scanning arm, allowing up to 4.5 extra inches to your scan. It's easily removable and can be stored in the scanning case for easy reference. This provides more flexibility to your imaging systems without having to purchase a larger scanning arm.

## FEATURES:

- **Adjustable Extension Bracket**

Attaches to the end of the scanning arm, adding 4.5 inches to your scan.

- **Removable and Portable**

Easily detachable for convenient use and can be stored in the scanning case for easy reference.

- **Durable Construction**

Made from resilient anodized aluminum for longevity.

- **Compatibility**

Designed to fit all standard NDTs scanning arms.

- **Cost-Efficient Solution**

Eliminates the need to purchase a larger unit.
