

LIGHTWEIGHT SCANNING ARM

Versatile, Lightweight, and Configurable to the Technician's Needs

FEATURES:

- **Compatibility Across Modalities**
Compatible with multiple inspection modalities for flexibility.
- **Lightweight One-Piece Design**
Ideal for inverted setups and streamlined inspection configurations.
- **Universal Array Support**
Designed to accept any type of array selection.
- **Reduced Footprint**
Efficiently designed to accommodate accessibility for complex configurations.
- **Flexible Cable and Hose Management**
User configurable with quick change features.
- **Scalable Length**
Custom scaled lengths are available for diverse inspection scenarios.
- **Integrated Direct Drive Carriage**
Designed with sealed bearing for stable torque transfer.
- **Large-Scaled Inspection Capability**
Utilized for consistent raster scanning while capturing detailed Eddy Current and Ultrasonic data.
- **Precise Dual-Axis Encoding**
Ensures thorough inspection results.
